(1) Deliver the following new affordable housing units:

Of which around 60% should be targeted at housing for social rent, with the remaining 40% targeted at some form of intermediate housing

(2) Secure existing housing stock from the private sector as affordable housing to reduce the number of households in housing need by 10 per year.

3 units to be purchased from the open market

7 empty units to be brought back into use

(3) Completed - Retain existing affordable housing stock by applying Pressured Area Designation in areas of identified housing need.

---

1 See footnote 1 – all forms of affordable housing with the exception of those for social rent.
Challenges

(1) Current financial climate indicates that public subsidy and private finance is likely to remain constrained over the short to medium term.

(2) Figures from the Housing Need and Demand Assessment – Update 2011 indicate that there is a central estimate of net annual housing need of 540 over the next 10 years (2010 – 2019) across Aberdeenshire.

(3) Increasingly high numbers of applicants on the Housing Register with increasing demand from single person households – young and elderly.

(4) High levels of homeless presentations and use of temporary accommodation, particularly bed and breakfast.

(5) Lack of affordable housing to rent and to buy both in terms of new supply and turnover of existing stock.

Opportunities

(1) To improve the health and wellbeing of the residents of Aberdeenshire.

(2) To continue to explore and progress innovative new funding mechanisms.

(3) To assist in the regeneration of different areas across Aberdeenshire.

(4) To stimulate and support the economy and in particular the construction industry.
